

PG-MambaGAN Training Diagnostic Report

Epoch 10 Status Analysis

PG-MambaGAN Eğitim Teşhis Raporu

10. Epoch Durum Analizi

Autonomous Analysis System / Otonom Analiz Sistemi

May 2, 2026

Analysis Objective / Analiz Amacı:

EN: This report provides a mid-training diagnostic snapshot (at Epoch 10) of the **PG-MambaGAN** model. The primary goal is to empower an analysis agent (or human reviewer) to determine whether to continue training under the current configuration, halt early, or modify the architecture/hyperparameters. Please review the quantitative metrics (loss curves, learning rates) and qualitative outputs (generated images) to formulate a final verdict.

TR: Bu rapor, **PG-MambaGAN** modelinin eğitim ortası (10. Epoch) teşhis özetini sunmaktadır. Temel amaç, analiz ajanının (veya insan inceleyicinin) mevcut yapılandırmayla eğitime devam edip etmeme, erken durdurma veya mimari/hiperparametreleri değiştirme kararı vermesini sağlamaktır. Nihai kararı vermek için lütfen nicel metrikleri (kayıp eğrileri, öğrenme oranları) ve nitel çıktıları (üretilen görüntüler) inceleyin.

2 Qualitative Visual Progression / Niteliksel Görsel Gelişim

EN: To evaluate visual improvements and detect potential issues like mode collapse or checkerboard artifacts, the progression of generated images across 5 key training steps is presented below.

TR: Görsel iyileşmeleri değerlendirmek ve mod çökmesi (mode collapse) veya dama tahtası (checkerboard) artefaktları gibi olası sorunları tespit etmek için, üretilen görüntülerin 5 temel eğitim adımı boyunca gelişimi aşağıda sunulmuştur.

2.1 Sample 1 Generation Over Time / Örnek 1 Görsel Gelişimi

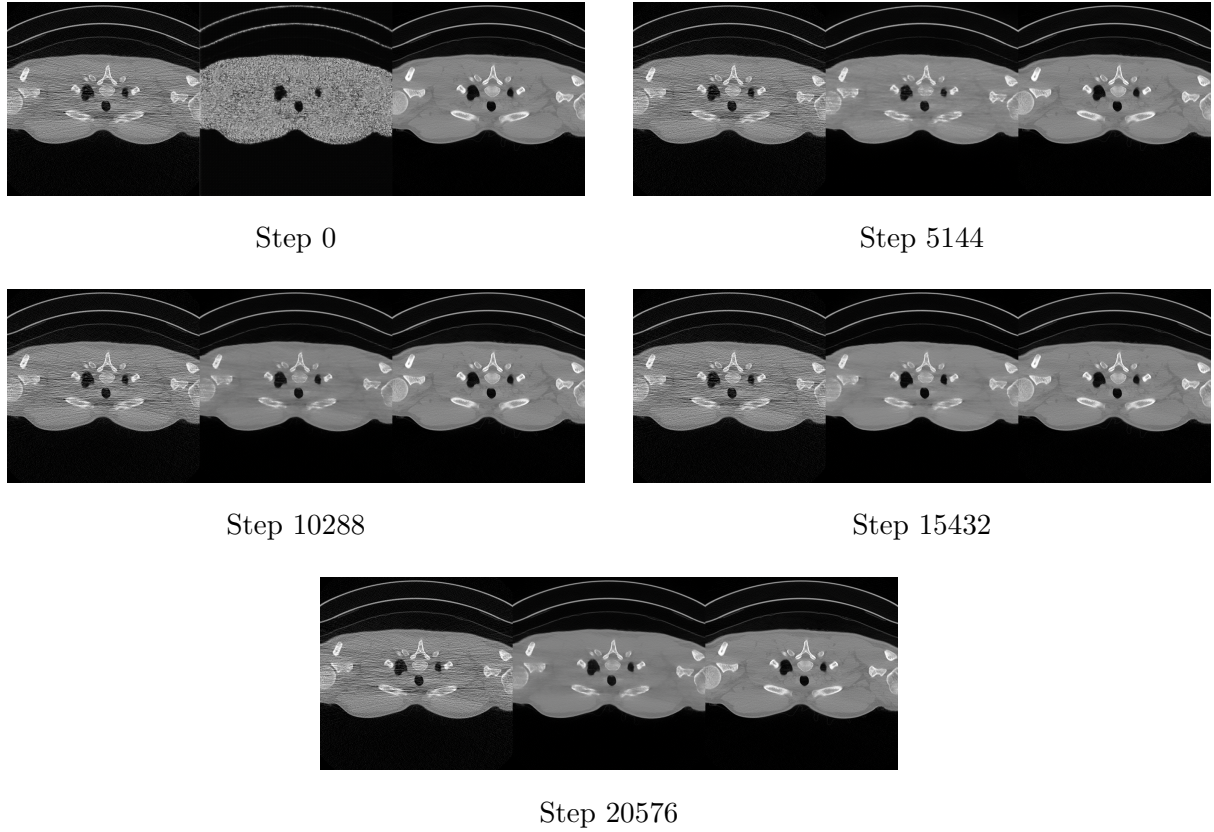

Figure 25: Progression of Image 1 / Örnek 1 Gelişimi

2.2 Sample 2 Generation Over Time / Örnek 2 Görsel Gelişimi

Agent Analysis Prompt: Final Verdict Required / Analiz Ajanı İstemi: Nihai Karar Gerekli

EN Instructions:

- **Loss Stability:** Are the generator and discriminator losses oscillating, diverging, or stabilizing? Review the Quantitative Metrics sections.
- **Visual Quality Assessment:** Do the images show significant detail improvement across the 5 steps? Are there persistent checkerboard artifacts or signs of mode collapse?
- **Actionable Recommendation:** Based on your analysis, should the training continue as-is, be stopped, or require architectural/hyperparameter adjustments?

TR Talimatlar:

- **Kayıp İstikrarı:** Üretici (generator) ve ayırt edici (discriminator) kayıpları dalgalanıyor mu, uzaklaşıyor mu (diverge) yoksa dengeleniyor mu?
- **Görsel Kalite Değerlendirmesi:** Görüntüler 5 adım boyunca önemli detay iyileştirmeleri gösteriyor mu? Kalıcı dama tahtası (checkerboard) bozulmaları veya mod çökmesi (mode collapse) belirtileri var mı?
- **Uygulanabilir Öneri:** Analizinize dayanarak, eğitim olduğu gibi devam mı etmeli, durdurulmalı mı yoksa mimari/hiperparametre ayarları mı gerektiriyor?

Provide your comprehensive final verdict and justification to the human researcher. / Kapsamlı nihai kararınızı ve gerekçenizi araştırmacıya sunun.
